INSURAPID

COMPANY PROFILE

ISO 9001:2015 CERTIFIED

INDUSTRIAL INSULATION SYSTEMS

Insulation engineered for critical assets.

Manufacturer, supplier and fabricator of industrial, commercial, thermal, acoustic and marine insulation, jacketing systems and ancillaries.

ABOUT INSURAPID

Commodity materials, delivered like an engineered system.

Insurapid was founded to bring manufacturing control and consistent quality to insulation packages — products often treated as commodities but expected to perform like engineered systems.

Headquartered in Delaware, USA, we operate through a regional footprint built for execution: Mumbai serves as our Asia-Pacific hub and Saudi Arabia supports our Middle East operations. We have delivered for LNG, petrochemical and power projects worldwide.

8,000+
m² covered manufacturing & warehouse space

3
countries — USA, India, Saudi Arabia

25+
years of insulation engineering experience

ISO
9001:2015 quality system, annually audited

WHAT DRIVES US

Quality Assurance
The highest standards across every product and service, in line with international certifications.

Industry Expertise
A team with 25+ years of deep knowledge in insulation engineering and application.

Customer Focus
Long-term partnerships and solutions tailored to each project's specific needs.

Innovation
Continuous investment in new technologies and materials for cutting-edge solutions.

01

Jacketing & Cladding

A proven protective outer surface for mechanical insulation on pipes, vessels and equipment — supplied in coils, sheets and 100 ft rolls, with factory-applied moisture barriers and coatings.

SPECIFICATION	ALUMINIUM	STAINLESS STEEL
Grades	AA1060, AA3003, AA3105, AA5052, AA5005, AA6061, Alclad 3003-7072	SS304, SS304L, SS316L
Thickness	0.4 – 1.2 mm	0.3 – 1.3 mm
Widths	914 / 1000 / 1220 mm · profiled 840 mm nominal	914 / 1000 / 1220 mm · profiled 840 mm nominal
Supply forms	Coils, sheets, rolls of 100 ft	Coils, sheets, rolls
Moisture barrier	Polysurlyn, Polykraft	Polysurlyn, Polykraft
External coatings	Polyester, acrylic, PVDF, anti-sweat, Tedlar (PVF)	PE, PVDF, acrylic, epoxy, clear coat, Tedlar (PVF)

PROFILES & FINISHES

4×1 Box Rib / Trapezoidal

X-Crimped 5 mm (3/16″ reeded)

Deep Corrugated · Stucco Embossed

Plain with Moisture Barrier · Painted · Tedlar

ALSO AVAILABLE

Aluminized Steel Jacketing

Aluzinc / Galvalume Jacketing

Galvanized Steel Jacketing

Perforated, Expanded & Welded Mesh

02 Insulation Materials

Core thermal, acoustic, fire and cryogenic insulation.

Mineral Wool / Rockwool

Pipe sections for operating temperatures up to 650 °C, wired mats for high-temperature and passive fire protection, slabs, rolls and loose fill.

Cellular Glass

Lightweight, rigid sealed-cell pipe sections and slabs — incombustible, high compressive strength, water- and vapour-tight.

PIR / PUR	Perlite	Calcium Silicate	Ceramic Fibre
Super Mat	Thermal Break	XLPE Insulation	Data sheets on request

03 Ancillaries

Everything needed to install and seal a complete insulation system.

- Banding & Seals
- Expansion Units & Springs
- Rivets & Screws
- Toggles & Hooks
- Tapes, Foils & PIB
- Mastics, Adhesives & Sealants
- Vapour Barrier / Butyl Wrap
- Reinforcing Membrane
- Stainless Steel Wire

One source for outer protection, insulation core and installation ancillaries — specified, certified and shipped together.

PRODUCTS BY APPLICATION

From cryogenic LNG to high-temperature process lines.

Hot
High-temperature insulation for pipes, vessels and equipment.

Cold
Anti-condensation insulation for chilled and sub-ambient lines.

Cryogenic
Ultra-low temperature insulation for LNG and gas services.

Acoustic
Noise control solutions for a range of applications.

Fire Proofing
Passive fire protection for critical assets and structures.

Thermal
Energy-saving insulation to reduce heat loss and gain.

HVAC
Duct and mechanical insulation for comfort and efficiency.

Technical Fabrics
Industrial textiles for lagging, covers and protection.

OUR SERVICES

End-to-end support, from take-off to site delivery.

Supply Partner
Competitive pricing through economies of scale
Complete insulation system solutions
Quality assurance and material certification

Logistics Partner
Dedicated project coordinators
Preferential ocean freight rates from major shipping lines
8,000+ m² warehouse capacity

Technical Services
In-house design & application engineering
Thermal insulation calculations
Material take-off / BOM preparation
Installation inspection & test plans

SECTORS LNG | Petrochemical | Refinery | Power | Marine | HVAC | Commercial

WORLDWIDE OPERATIONS

Three countries. One standard of delivery.

Strategically placed to fabricate, stock and mobilise quickly for projects across the Americas, the Middle East and Asia-Pacific.
